

Redwood Times

Farseer Foretells

Sage Okwaho Redwood

*This is for entertainment
only.*

May 21 - June 20 2023

Aries

March 21 - April 19

Someone wants your attention, but do you want theirs? Find a reason to head to Stonebull Lake and take a relaxing vacation away from other's demands.

Taurus

April 20 - May 20

Seems some friends have been on you about your choices. Take some deep breaths, even if you are Forsaken, and when they are ready to listen, let them have it... add a warstomp if you have to!

Gemini

May 21 - June 20

You have some things to make right. Best get started right away, once Mu'sha rises when you head to Black Temple next, it may be too late.

Cancer

June 21 - July 22

Time to change things around. Have an important person in your life. Do they want the unexpected? You may have to see it from their point of view and give it a chance. If they are important to you, it might be more important to you, too.

Leo

July 23 - August 22

Whatever course Mu'sha is taking right now is not to your benefit... at least on the course you are taking. Pay attention to some Sage advice to get through these rough times.

Virgo

August 23 - Sept 22

Spend time learning something new. You never know when you might need to pick up a hammer and smelt an ingot or mix a concoction to save a life. Or, you can trust your tribes mate to help out! That might be safer if you need an antidote.

Libra

Sept 23 - October 22

This next cycle of An'she should inspire you to write or draw, let the artist in you go and see what comes of it!

Scorpio

October - 23 - November 21

Hard for those Scorpio's amongst us, but let this be a time of healing and reconciliation. The hard part will be to listen and let go, because those walls around you seem to be made of Saronite... that ain't healthy, dude!

Sagittarius

November 22 - December 21

As An'she rides high overhead, now is the time to lean back against a Redwood tree and let your thoughts wander on good memories and loved ones. If they happen to have returned from the dead, even better!

Capricorn

December 22 - January 19

You have been pulled through the Kodo dung as of late, but the time has come to shine. If others can't see the gem, their loss.

Aquarius

January 22 - February 18

Whatever has been happening, no matter how intense things have been for you, look forward to more relaxing times ahead. Kick up your hooves and let the Earth Mother steer for a bit.

Pisces

February 19 - March 20

There have been some good days lately, and it seems to be on the rise! Keep your ears open and opportunities may strike, or at least you might catch a rogue sneaking up on you and save your life. Either way, you win!
